## **Loqu8 Reaches Semifinals at Salesforce.com AppQuest Contest**

*Loqu8 Insight speeds access to Chatter and Salesforce.com CRM*

Mountain View, Calif. – Loqu8 was pleased to accept an invitation to Salesforce.com’s AppQuest contest to identify the next killer application for the cloud. As a Force.com developer, Loqu8 was chosen for its groundbreaking Insight application that rapidly displays CRM and Force.com information through context-sensitive popup windows.

The AppQuest expert panel was “blown away” by all the innovations displayed by the semifinalists in the contest. From a worldwide pool of over 120 entries representing the best energy and talent in the ecosystem, applications were judged on several criteria, including their effective use of real-time collaboration capabilities (including Chatter), innovation, integration of Force.com technologies and early customer successes.

“Loqu8 is honored to present our Insight product for consideration at AppQuest,” stated Dr. Timothy Uy, President and CEO of Loqu8. “Our customers are very excited by Insight’s instant information access capabilities and how it encourages workers to expand their use of cloud applications. Insight’s cloud access and acceleration attributes address the key pain points facing today’s mobile and virtual workforce.”

### **Pricing and Availability**

Loqu8 Insight scales seamless from an enterprise-wide knowledge management platform (Enterprise edition) to solutions for functional teams and smaller organizations (Team edition). Insight supports Salesforce.com CRM, Force.com, Microsoft Outlook, SharePoint, and Google Docs.

Download Loqu8 Insight Personal Edition at no charge from [www.loqu8.com](http://www.loqu8.com). Free 15-day evaluations of other editions are available from \$25 USD per user. Contact Loqu8 for information on volume discounts and site licenses.

**About Loqu8**

Display information from cloud-based applications--without opening a web browser. Just point and Loqu8 instantly displays the information you need. Loqu8's augmented intelligence model is the result of years of research at Stanford University in cognitive science and information processing. Loqu8 is a privately-held corporation with headquarters in Silicon Valley. For more information, visit [www.loqu8.com](http://www.loqu8.com).
